

Global Methyl Bromide Production for Soil, Storage and Structural Uses, 1991-1998 (MT)

Countries	Baseline	1991	1995	1996	1997	1998
Article 5 (Developing)	1,325	124	321	1,118	1,477	2,382
Non-Article 5 (Developed)	66,002	66,002	58,121	60,126	59,670	59,054
Total non-QPS MB		66,126	59,442	61,244	61,147	61,436

Source: UNEP/TEAP 2000.

Note: QPS and feedstock are excluded from this table. 1991 data for Article 5 and non-QPS MB are incomplete and 1998 data for Non-Article 5 and non-QPS MB are estimated, as production data for Israel are not included.

- Total production for soil, storage and structural uses in 1998 was approximately 61,436 MT, where 4 percent was by Article 5 countries and 96 percent by Non-Article 5 countries.
- Production of methyl bromide for all uses (including QPS and feedstocks) was approximately 71,400 MT in 1997.
